

IML AMUT-COMI EASY Decoration for thermoforming containers with high quality labels

(Novara, Italy – 26 August 2020) – AMUT-COMI's R&D department has recently developed EASY Decoration, an IML (In-Mold Labelling) technique for thermoforming.

This innovative solution differs from those currently available on the market that are combined with form and punching machines with tilting mould, as it has been conceived for a form and die cutting machine. Perfectly adaptable to AMUT-COMI's standard ACF series, our in-mold labelling module is available for round, oval and rectangular containers. It is based on a side-entry label depositing robot, which positions labels in the mould cavities and is designed to enable an easy and fast transition from the IML version to traditional thermoforming. The IML unit is mounted on rails to allow it to be moved during the change of moulds.

EASY Decoration offers as main advantages, compared to the solution available for tilting machines, flexibility and cost-effectiveness and is suitable both for small and medium batches as well as for large production volumes. The IML decoration allows to obtain food packaging with a label of the same material, favoring a more efficient and eco-friendly post-consumer disposal. Thermoforming combined with the Easy Decoration system allows to grant a more aesthetically appealing packaging, with a low weight and quality suitable for the long preservation of the product, thanks to the use of barrier materials (multilayer), compared to traditionally injection molded containers.

EASY Decoration is simple, reliable and adaptable to specific needs.

About AMUT

AMUT (Automazione Macchine UTensili), established in 1958, is a global plastic processing, recycling and waste sorting & recovery systems designer and manufacturer. Over the years the company has evolved considerably and become a group providing customers with an increasingly extensive range of high quality Extrusion, Thermoforming, Recycling, Flexo Printing and Converting machinery, lines, turn-key plants and related Services. The world Headquarters and production facility is AMUT S.p.A. which is located in Novara (Italy). Candelù (Italy) and Vigevano (Italy), complete the manufacturing sites. Operating globally, the group's offices and customer service centers are strategically located in U.S.A., Canada, Brasil and South East Asia. This international presence is further enhanced through an efficient worldwide agent network. Learn more at www.amutgroup.com
