Established in 1958, AMUT is a global leader in Extrusion and Recycling, for applications ranging from packaging, medical and pharmaceutical, automotive, furniture, to building and construction and waste handling.

The company designs and manufactures highly performing, energy efficient turn-key plants and patented machineries for plastics processing, recycling and waste handling industries through its Extrusion and Recycling Divisions.

AMUT Extrusion division provides extruders and related ancillary down-stream equipment and turn-key lines for the production of foils, stretch films, sheets, waterproofing membranes, pipes and profiles.

AMUT Ecotech division specializes in the design and construction of washing plants for PET/HDPE/PP bottles, containers and PE film, as well as waste sorting equipment and recycling facilities for urban and industrial waste.
